Waste and Materials Management. Redefined.

WASTE & RECYCLING CARTS

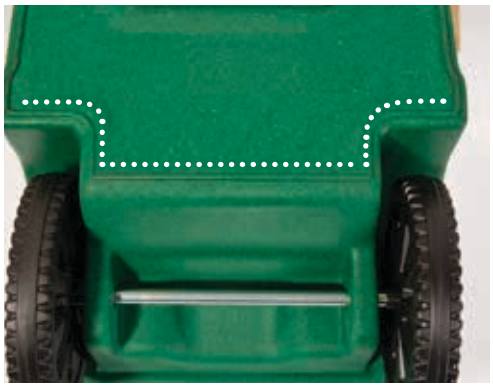
There's no other cart for waste, recycling, and organics that's built to last quite like a Toter. They're manufactured with a patented stress-free Advanced Rotational Molding™ process for superior product durability and years and years of service life. Toter carts are extremely tough in the areas that take the most abuse, so they'll stand up to just about anything that's tossed in them – or at them.

Toter carts are available in multiple sizes and colors, with optional features for specific waste and recycling needs in industrial, commercial, and institutional environments.

INDUSTRY-LEADING DURABILITY

Toter carts are manufactured with a patented stress-free Advanced Rotational Molding™ process that provides superior product durability for years of service. Toter carts are extremely flexible and impact-resistant, and easily handle the day-to-day abuse of waste collection. With patented Rugged Rim® technology, added materials in critical-wear areas such as the rim and saddle, and a reinforced bottom wear strip, Toter carts are extremely tough in the areas that take the most abuse. In comparison, our competitors manufacture carts with an injection-molded process that results in high residual stress and brittle plastics that crack and break prematurely.

Toter carts are extremely impact-resistant — they flex, but don't break.



Only Toter carts have heavy-duty bottom construction with a reinforced wear strip.

Only Toter carts have a patented Rugged Rim®

STACKABLE, NESTABLE, AND READY-TO-ROLL

Toter's carts are stackable and nestable and ship fully assembled, so they're ready-to-roll as soon as they arrive. They can be shipped partially assembled if requested/required. Plus, nested carts save storage space when not in use.

UNIVERSAL WASTE INDUSTRY COMPATIBILITY

Toter's carts are built with a universal design – they're compatible with most mobile and stationary cart lifters.

CART FEATURES

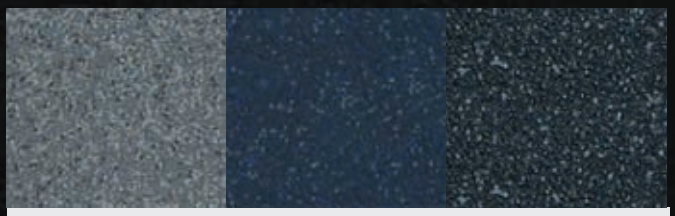
- Manufactured with patented Advanced Rotational Molding process for years and years of service.
- Flexible and impact-resistant to handle the day-to-day abuse of waste collection.
- Super easy to maneuver. With the industry's best tilt-to-roll ratio, an ideal handle height, best-in-class ergonomics, and rugged wheels, Toter carts are easy to tilt and roll – even when completely full.
- Low, narrow profile is easy to maneuver and fits through most doors.
- Compatible with most cart lifters.
- Contain up to 50% recycled content, and are 100% recyclable.
- Backed by an impressive industry-leading warranty.
- Available in multiple sizes (32, 48, 64, and 96 gallons).
- Available in a variety of standard colors as well as upscale granite colors that complement contemporary environments.
- Toter carts meet ANSI standards for safety and lifter compatability.

CONTEMPORARY COLORS

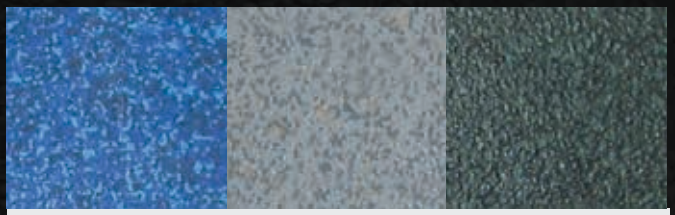
Toter carts are available in a wide variety of standard colors, as well as upscale granite colors and textures. Granite finishes offer an attractive option for commercial, industrial, or institutional environments. Not only does the beautiful granite finish complement contemporary environments, it also masks normal wear by helping hide scuffs, scratches, and unsightly dirt, keeping carts looking new for years and years.

BLACK #200 | BLUE #705 | BROWN #270

GRAY #125 | GREEN #940 | RED #570



DARK GRAY GRANITE #128 | NAVY GRANITE #769 | BLACKSTONE #209



BLUESTONE #709 | GRAYSTONE #129 | GREENSTONE #968

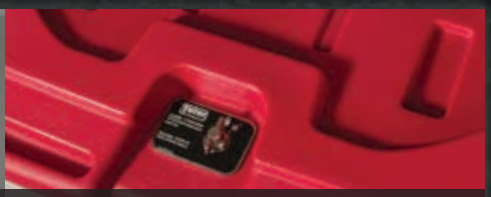
SANDSTONE #249 | BROWNSTONE #279 | GREEN GRANITE #929

Colors and textures shown are as accurate as printing allows. Actual product colors and textures are subject to variation from printed sample.

LID OPTIONS

Standard Lid

Padlock Hasp Lock Lid



Locking Medical Waste Lid

Standard Lid With Paper Slot

Locking Confidential Document Lid

Self-latching, Locking Lid

Patented Rugged Rim technology adds rigidity, and reinforced material in critical wear areas extends life of cart.

Large area for optional custom graphics.

Textured surface resists scuffs and scratches and hides unsightly dirt.

Factory-installed 360° rotating steel stop bar is attached in a molded-in, sealed journal.

Casters maximize maneuverability with heavy, cumbersome loads.

5/8" axle provides over 2,000 lbs. of bending strength. Molded-in axle journal provides more than six times more support compared to drilled holes typical in injection-molded carts.

Caster carts include quiet cap wheels for minimized noise.

CASTER CARTS

Available in 32-, 64-, and 96-gallon sizes, Toter caster carts are ideal for maneuvering the heaviest of loads. Added caster wheels eliminate the need to tip the cart to roll, helping to stabilize heavy loads. They feature load ratings up to 335 pounds (load ratings vary by cart size), and are available with multiple lid options. Optional pull bars are available, so multiple carts can be pulled at the same time.

Optional pull bar

ORGANICS CARTS

Only Toter offers two-wheel and caster carts specifically designed to withstand the added burden of collecting heavy, wet organic waste. These heavy-duty, commercial-grade carts feature impressive load ratings up to 400 pounds (load ratings vary by cart size). Toter's organics carts exceed ANSI standards – they'll withstand 6-1/4 pounds/gallon vs. standard 3-1/2 pounds/gallon. They have a molded-in, sealed stop-bar that prevents leakage. Optional lids with gaskets that minimize odors and leaks are available for 64-gallon carts.

SUSTAINABILITY

Toter's commitment to environmentally responsible manufacturing is evident with every product we make. Toter carts not only outperform and outlive every other cart on the planet, they contribute to sustainability initiatives in many positive ways:

1) RECYCLED CONTENT

Eco-friendly Toter carts are manufactured with up to 50% recycled content, with steel components containing 80% to 100% recycled steel.

2) RECYCLABLE

Toter carts are made of BPA-free polyethylene and are 100% recyclable. In fact, Toter recycles used carts into new carts every single day!

3) REDUCED MATERIAL CONSUMPTION IN MANUFACTURING

Each 96-gallon Toter cart is manufactured with up to five fewer pounds of plastic compared to other carts.
