GALBREATH HOPPERS

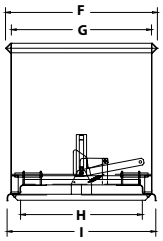
Galbreath®

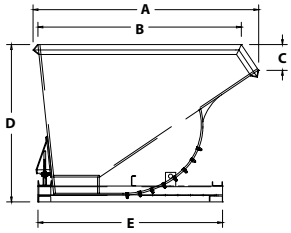
WASTEQUIP Toter® Accurate MOUNTAIN TARP PIONEER CUSCO PARTS PLACE

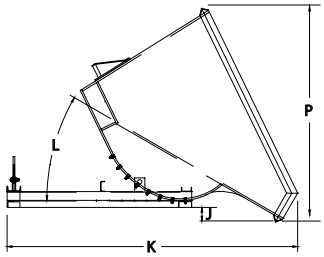
Galbreath hoppers are great for storing, transporting and dumping scrap and bulk material. Self-dumping hoppers are designed for industrial, commercial and institutional applications and are particularly useful for in-plant housekeeping, in-process material handling, sorting and storing, scrap collection and other rugged applications. Self-dumping hoppers allow for safe and easy loading, transporting and dumping of material. Galbreath hoppers are available in large capacity, low profile, open end and light duty models. Hoppers come with standard red oxide primer finish or can be painted in variety of colors.

FEATURES:

- Standard red oxide primer finish
- Unique tapered press fitted rocker pin that when "rocked in" self centers front and back and side to side
- Standard hopper lock (1)
- Press fitted locker pin (2)
- Spring loaded latch with reinforced latch pin
- Continuous welded seams for watertight construction
- Plasma cut sides and rocker guides







HEAVY DUTY SELF-DUMPING HOPPERS

Galbreath heavy duty self-dumping hoppers are designed for forklift handling of materials, particularly for demanding applications such as commercial construction, machine shops, fabrication, in-process material handling, sorting and storing operations and scrap collection for metal, glass, stone and more. The 7 gauge steel body features a channel for additional support on the hopper body and an angle reinforced formed steel base with 1" plate rocker stops. Rocker allows the hopper to roll forward and backward for easier dumping with the pull of a handle. Rocker stops lock the hopper in place for safety.

Available in 1/8, 1/4, 3/8, 1/2, 3/4, 1 and 1-1/2 yard capacities.

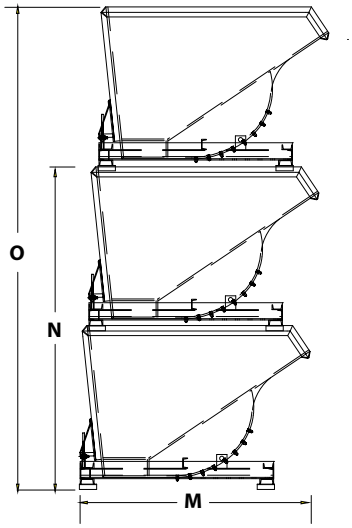
HEAVY DUTY SELF-DUMPING HOPPERS (LARGE CAPACITY)

1- 1/2 to 5 cubic yard hoppers

Galbreath heavy duty self-dumping, large capacity hoppers are designed for "shock" loads or conveyor feed applications for foundries, scrap haulers and similar applications that require a structural base. They feature a 7 gauge steel body with angle reinforcements and structural steel base.

Available in 1-1/2 , 2, 2-1/2, 3, 4 and 5 yard capacities.



FEATURES:

- Heavy duty 7 gauge steel body
- 1" round rocker stops on 1-1/2, 2, 2-1/2 yd. models
- 1/4" round rocker stops on 3, 4 and 5 yd. models
- Continuous welded seams for watertight construction
- Designed for 4,000 to 6,000 lb. capacities

HEAVY DUTY SELF-DUMPING HOPPERS (LOW PROFILE)

2- 1/2 to 3-1/2 cubic yard hoppers

Galbreath heavy duty self-dumping hoppers with low profile design offer the advantage of increased capacity for equipment that requires a lower height requirement. Units incorporate a new heavy duty base for forklift handling of materials, in-plant house-keeping, scrap collection and more. These hoppers feature a 7 gauge body with angle reinforcement and 1" round rocker stops.

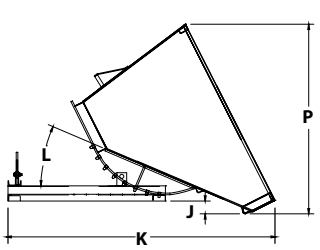
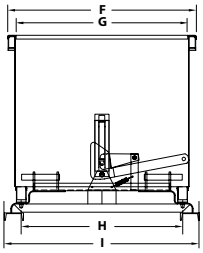
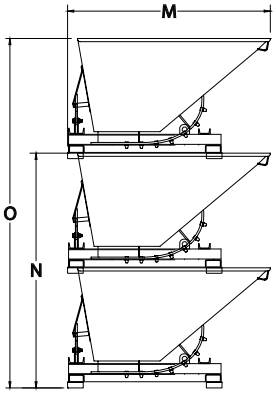
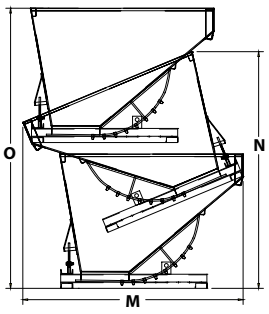
LIGHT DUTY SELF-DUMPING HOPPERS

1/2 to 2-1/2 cubic yard hoppers









NOTE: The LH-50 and LH-100 stack. The LH-150, LH-200 and LH-250 nest.

Galbreath light duty self-dumping hoppers are ideal for lightweight materials or bulky materials that take up more space than weight. These hoppers are a great fit for lightweight recycling, plant maintenance, wood scraps of all types (sawdust, pallets, cabinets, paper mills) as well as cardboard, plastic and metal shavings. Hoppers are constructed of 12 gauge steel with fully welded rocker stop supports and formed base.

OPEN END SELF-DUMPING HOPPERS

Galbreath open end self-dumping hoppers are constructed from heavy gauge steel and designed for forklift handling of long materials. This hopper is ideal for lumber, plastic/metal pipe or re-bar, large sheet material, construction material or fencing scraps. It is designed to handle a variety of debris varying in length and thickness. These hoppers are constructed of 7 gauge formed channel frame and formed steel base equipped with 1" round rocker stops.
